Cherry Tree Lane, Rawtenstall

09/06/2010 CASE STUDY

The Location
 Cherry Tree Lane is one of the most prime retail locations in the Northwest of England. Located in Rawtenstall, north of the town of Burnley, it surrounds the busy junctions of Cherry Street and Dry Road. It is home to a number of retail/food stores and small businesses. Some of these open/close experienced management in recent years, thanks to the competitive commercial policies of Electricity Borough Council.

The Challenge
 A large group of 8 business owners occupied the Cherry Tree Lane area for an extended period of time. Given the lack of proper sewage and water disposal systems, the area was left in a state when the owners vacated the area. A lot of human and animal waste were deposited and left in the surrounding area to address, other waste was left behind, such as broken furniture, food packaging and non biodegradable products. The park area required extensive operations to ensure it to be in a good condition before it was occupied.

Our Approach
 North Star carried out an extensive survey of the area to determine the scope of the task and the most appropriate solution to apply. The initial assessment covered the size of the area, different types and quantity of waste materials, bulky furniture and any potential damage to the natural environment. We then devised a bespoke solution to carry out the clean and work promptly started the next day with a 3 man team. Equipped with protective gear, removal equipment and cleaning agents, our team carried out a comprehensive clean of the area using North Star's integrated cleaning process. A 200 tonne waste load was taken to the depot to ensure the quality of the clean. This commitment confirmed the operation was completed with North Star high quality standards.

Currently working on industrial **case studies** for *North Star Cleaning Services*, where I put reports together, draw schematics and taking **before and after photos**.

I was working on a regular 3 month long project preparing and layout editing the actual end user **trade catalogue** for *Legrand*, which needed great attention to detail.

I also worked with **package designs** for *General Electric (GE)*, where I had to prepare artworks of light bulb packages to print specification, reproducing logos, re-draw or modify them as a vector graphic in Illustrator.
